Subject: Key Sustainability Highlights from IHH Healthcare's 2024 Report

Dear Marketing Department,

I trust this email finds you well.

Upon reviewing IHH Healthcare's 2024 report, I would like to highlight several key sustainability initiatives that may support future marketing communications. The report demonstrates that IHH Healthcare remains committed to its mission of "Care. For Good." through continuous improvements in patient care, employee development, and environmental responsibility.

One notable achievement is IHH's focus on patient-centred care. The organisation increased its value-driven outcomes quality indicators from 113 to 202 and provided more than 8 million patients with online access to their medical records. These accomplishments support a strong marketing narrative centred on digital healthcare, transparency, and patient empowerment.

Another important aspect is IHH's investment in its workforce. In 2024, the organisation recorded nearly 1.2 million training hours, achieved a 14% increase in nursing talent compared to its 2022 baseline, and maintained 49% female representation in leadership positions. These achievements demonstrate IHH's commitment to professional development, diversity, and inclusive workplace practices.

IHH also made significant progress in environmental sustainability. The organisation reduced emissions intensity per patient bed day by 3.2% and achieved almost a 90% reduction in single-use virgin plastics across non-clinical operations in several markets. These initiatives reinforce IHH's position as a healthcare provider committed to environmental stewardship.

I recommend that future marketing communications emphasise IHH's strengths in quality healthcare, digital innovation, employee development, diversity, and sustainability. These themes effectively communicate the organisation's commitment to responsible healthcare practices and long-term stakeholder value.

Thank you for your time and consideration.

Kind regards,

Ereen Shamimi binti Samrih
